PUBLIC NOTICE

Hunting Safety by the Airport

We advise community members of reports concerning our local Airport. Gunshots hunting activity at a distance less than half a kilometre from the Terminal perimeter.

Federal law states hunting near any airport is prohibited. **Transport Canada's safety regulations say it is a "NO HUNTING ZONE" within 5 kilometers from any Airport unless authorized by public safety along with Airport management.**

The Cree Nation of Chisasibi requests that community members follow this law and the regulations for the safety of everyone, including the flights coming into the Airport.

We are not saying that you are not allowed to go hunting. By Federal law, rifles or shotguns are not permitted near any Airport within a perimeter of 5 kilometers.

Therefore, we request everyone's cooperation - to follow the Airport operations and regulations. **We urge parents and the public to notify their youth not to hunt with a firearm near the Airport.**

Thank you for your understanding.
